RAJASTHAN HOUSING BOARD

TO WHOMSOEVER IT MAY CONCERN

Rajasthan Housing Board through its authorised signatory C R Depan regarding our project **Udhyan Apartment MIG-B (B+S+9) Block "k" Sec. 21 E, Jodhpur** DIV-I declare that over the period of registration time Stilt Floor Plan has been replaced but in Building Sanction Plan old Stilt Floor Plan is uploaded and can't be changed due to technical network error (Copy is attached). But in Floor Plan section and copy of layout Approval document section amended copy of Stilt Floor Plan is uploaded. So kindly accept that amended drawing of Stilt Floor plan in lieu of old stilt Floor Plan.

Authorized Signatory

Server Error in '/' Application.

Access to the path 'E:\website\wwwroot\Content\Project\Building\452\4a056af3-d871-40d5-989a-308af38b5cb6.pdf' is denied.

Description: An unhandled exception occurred during the execution of the current web request. Please review the stack trace for more information about the error and where it originated in the code.

Exception Details: System.UnauthorizedAccessException: Access to the path 'E:\website\wwwroot\Content\Project\Building\452\4a056af3-d871-40d5-989a-308af38b5cb6.pdf' is denied.

ASP.NET is not authorized to access the requested resource. Consider granting access rights to the resource to the ASP.NET request identity. ASP.NET has a base process identity (typically (MACHINE)\ASP.NET) or Network Service on IIS 6 and IIS 7, and the configured application pool identity on IIS 7.5 that is used if the application is not impersonating. If the application is impersonating via `<identity impersonate="true"/>`, the identity will be the anonymous user (typically IUSR_MACHINENAME) or the authenticated request user.

To grant ASP.NET access to a file, right-click the file in File Explorer, choose "Properties" and select the Security tab. Click "Add" to add the appropriate user or group. Highlight the ASP.NET account, and check the `BOX` for the desired access.

Source Error:

An unhandled exception was generated during the execution of the current web request. Information regarding the origin and location of the exception can be identified using the exception stack trace below.

Stack Trace:
